

with faster, easier installation and longer life for both street and racing engines.

"Performance One" spring kits—with hard anodized aluminum or titanium collars—have the only spring/collar combination that will allow lifts up to .550 and seat pressure of 140 lbs., without head modification or machining.

These interference-wound springs reduce high rpm valve float and eliminate spring harmonics. Branch Valve Springs are computer-designed and manufactured to Branch specification. They are triple heat-treated, heat-set, shot-peened, blued and completely inspected for top quality.

The Mustang Ranch Belt Buckle

Hencel Products, manufacturers of belt buckles, is offering a new item,

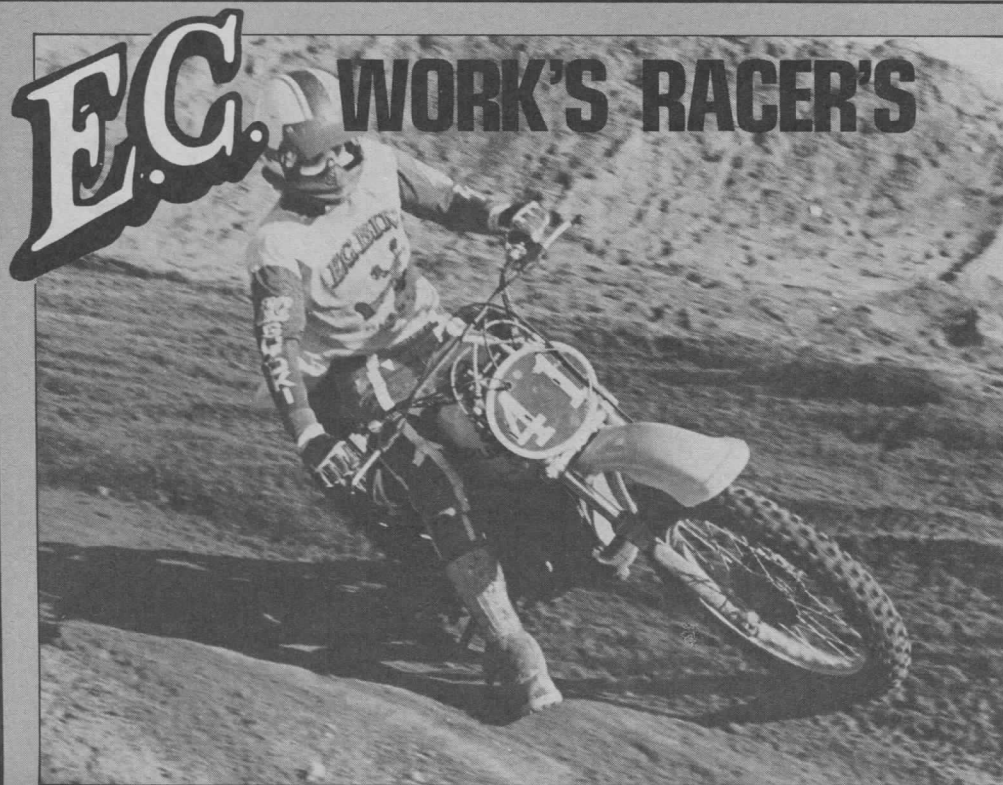

the MUSTANG RANCH buckle. Hencel's MUSTANG RANCH buckle was not designed to commemorate the small, hardy, swift horse of the plains that revolutionized the life of the Indians, nor any institution offering range space to these animals that are often strays and homeless. Rather, the MUSTANG RANCH buckle takes subtle note of the world's oldest profession as practiced, legally, in the country's most famous bordello, Mustang Ranch, in Nevada. While not personally autographed by any of the ladies who frolic there, the MUSTANG RANCH buckle definitely marks the wearer, symbolically, at least, as one of great endurance and stamina, as is the wiry mustang. The MUSTANG RANCH buckle is the newest addition to a complete line of belt buckles manufactured by Hencel Products. If not available at your dealer, this exciting belt buckle may be ordered directly from the manufacturer for \$6.95, plus \$1 for postage and handling. (California residents add sales tax.) Dealer inquiries invited. Catalogue and price list available.

Touring Tooter

The Windkutter Packer is vacuum formed of cyclac ABS. Readily available in black or white. The Packer can be color matched to most popular motorcycle colors. The Packer's unique side opening feature allows for compatibility with most luggage racks and sissy bars. The Packer is designed to hold two helmets with room to spare. Side safety reflectors are standard. The Windkutter Packer can be optionally equipped with a back rest that provides comfort for the rider while on extended tours or just short rides. Optional Packer liner adds a luxurious texture to the inside, while pampering stored items. ■
